

**Questions a Board should raise with Management
regarding Cyber threats and Investment**
董事會應否向管理層提出關於網絡威脅和投資的問題

We are facing new threats in cybersecurity every day. To prevent and combat cyber threats effectively, establishing the security operation center could be one of the solutions. Security operation center is defined as a central control of all security information. But some organizations may think it is not worth investing resources in managing one.

In this training session, we will introduce some effective methods and tools for risk management team to keep track of the latest trend of cyber threats, and discuss the importance and influence of building a security operation center.

Highlights:

- Top 5 new threats in 2018-19
- How to set up the threat intelligent platform
- Pros and Cons of building in-house Security Operation Centre

我們每天正面對新的網絡安全威脅。為有效防止及打擊網絡威脅，設立安全營運中心為其中一種解決方案。安全營運中心定義為所有保安資訊的中央控制。然而，部分機構或會認為不值得投放資源以管理安全營運中心。

於是次的培訓，我們將為風險管理團隊介紹若干有效方法及工具以掌握網絡威脅的最新趨勢，並討論建立安全營運中心的重要性及影響。

摘要

- 2018 至 19 年的 5 大新威脅
- 如何設置威脅情報平台
- 建立自家安全營運中心的利弊
